

Authorization Tracking

Ensure that patient treatments are authorized.

With our Authorization Tracking service, we acquire authorization from insurance companies so that you can provide care to your patients right when they need it.

This service can help you:

- ✓ Track the scheduled appointments and ensure that the authorization is recorded in the patient's chart a week before the appointment.
- ✓ Send an authorization request a month before the scheduled appointment, giving ample time for review.
- ✓ Check the authorization details daily to ensure that the necessary documents are ready for the set appointment date.

Utilize remote staff to acquire proper and comprehensive authorization details faster.

1 Send Authorization Requests

We fill out treatment request forms or call insurance companies to expedite the request process.

2 Track and Follow Up Authorization Requests

We routinely follow up the insurance companies about the requests and then update your authorization tracker accordingly.

3 Update the Patient's Insurance Details

Before the request for authorization is submitted, we check the insurance portal or call the insurance company to check if the request needs prior authorization. At the same time, we update the insurance contact details.

4 Authorize New Referrals

When new referrals are received, we track the newly referred patients and check and update their authorization status.

5 Follow Up Requests for Approvals

To keep the authorization status updated, we routinely follow up insurance companies about the authorization requests.

6 Faster Turnaround Time

Our highly trained and experienced remote employees help you acquire the necessary approvals quicker.
