

AR Management

It now takes less effort to collect the money you deserve.

We automate your accounts receivable management without interrupting your standard billing process and adding extra operational costs.

We handle 60-day old receivables, eligibility, patient statements, and more.

This service can help you:

- ✓ Secure the money from your old AR.
- ✓ Improve the revenue cycle of your clinic.
- ✓ Maintain the integrity of your current billing outcomes.
- ✓ Organize AR records.
- ✓ Focus on activities that generate more income.
- ✓ Spend less time on AR and decrease operational costs.

Upgrade your billing process and maximize your revenue.

1 Manage Insurance Records and Rejected Claims

Our remote staff handle insurance records, verify the patient's insurance coverage, and update every rejected claim with accurate details and have them approved for resubmission.

2 Manage Your Account Receivable

We retrieve the necessary funds, focusing on your AR that are 60 days old. We also bill or rebill claims, write off balances, and track the collection status of all receivables.

3 Follow Up Patient Statements

We generate and send patient statements. To ensure that payments are collected, we regularly check patient balances and send the necessary follow-ups.

4 Follow Up Pending and Unpaid Claims

We get in touch with the payer, track the status of the claims, and do the necessary tasks to confirm that the ERAs and EOBs are sent and to ensure that they are paid in a timely manner.

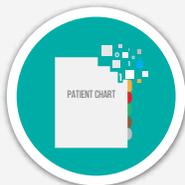

5 Assign Billing Tasks

Each billing-related process is assigned to a dedicated remote employee, reducing errors and increasing efficiency. No change to your current staff, process, or technology is needed.
